

- LP075 Universal Electrical Head stunner -

Meat processing
Far Beyond EC1099

LP075 - Universal electrical head stunning of poultry and lagomorphs

In December 2013 European legislation came into force, regarding the stunning of animals preceding the killing of animals for the benefit of consumption.

Dutch Vision Solutions develops stunning technology for the meat processing industry, for both small-scale and large-scale industrial purposes.

The Dutch Vision Solutions' applications are falling well within crucial parameters of European legislation regarding the slaughter of animals, which are established in the EC1099 and/or EFSA.

A distinguishing factor is the one-person operating comfort and easy adjustment possibilities.

The Universal head stunner is factory equipped with a PLC which your production is logged upon. The installed modem can be used to read your production data via internet/Wi-Fi connection. This way you can adjust the machine settings from any online situation.

Price: LP075 - Lagomorf/Poultry (max. 750 mA)
€ 8,155 excl. VAT

Choose a Universal head stunner by Dutch Vision Solutions, developed for small scale meat processing, compliant with the EU1099 norm.

- LP075 Universal Electrical Head stunner -

Meat processing
Far Beyond EC1099

LP075 Universele elektrische kopverdooving Lagomorfe/Poultry (max. 750mA)

						
Rabbit/Hare	Chicken	Quail	Goose	Duck	Turkey	Ostrich
0,40A	0,24A	0,50A	0,60A	0,60A	0,4A	0,5A

When using electrical stunning exclusively via the head of an animal, the electrodes are attached to each side of the animal's brains and adjusted to the size of the animal.

In case of electrical sedation exclusively via the head of an animal, minimal amperage is used, as prescribed in the regulation of the EU commission – EC1099.

See table above.

On-line with integrated modem

The Universal head stunner is factory equipped with a mini-computer which your production is logged upon. The installed modem can be used to read your production data via internet/ Wi-Fi connection. This way you can also adjust the machine settings from any online situation.

Easy operation and settings

In addition to the easy one-person operating comfort, using the LP075 you can easily switch to a different type of stunning, if required by your production.

Choose a Universal head stunner by Dutch Vision Solutions, developed for small scale meat processing, compliant with the EU1099 norm.
